Mr. Todd Mace
Dynamix Energy Services
855 Grandview Ave.
Columbus, OH. 43215

Dear Todd,

I would like to thank you and your team of engineers, as well as the contractors that have worked on our HVAC project. From the installation of 14 miles of gas line to the chiller that was set and running in just a few days have all worked seamlessly. The engineering and communication and logistics worked very smoothly. Any problems that did arise were taken care of quickly.

The attention to detail and monitoring of the system before, during and after the fact has been amazing. Your team continues to come up with cost saving measures and ideas even as the project is coming to a close.

The FMX facilities software that was implemented with the project has been an added bonus. The software is so versatile that I see us using it in many aspects of the school environment from scheduling rooms to online forms. Its possibilities seem to be endless.

The project started to save money the first month and has continued to increase in savings each month.

Sincerely,

A handwritten signature in black ink that reads "Ervin Baldwin".

Ervin Baldwin

Facilities Supervisor
